

Shuffleboard Tables.

Shuffleboard tables are ideal in many game room settings. Shuffleboard tables can go up against a wall to save space or be placed in the middle of a room to define the space. All California House tables come with a set of custom California House weights (pucks) and speed beads.

Styles of Shuffleboard Tables Available (as of June 2018) –

Sizes: All California House Shuffleboard Tables are available in 9', 12', 14', 16', or 18' lengths and are 32" wide overall. The playfields are all 20" wide.

What Separates California House Shuffleboard Tables from the Competition:

- Our boards start with a better selection of lumber. Instead of maple playfields, we make ours out of beech, which is 11% more rigid and 19% more shock resistant than maple.
- Because beech is so stiff, we were able to reduce the thickness of our playfield from 3" to 2.125" to allow for the proper concavity adjustment and playability of the boards. California House also double tongue-and-grooves (TNG) our planks for superior torsion strength and to allow for more glue surface between the planks.

- Cal House playfields are balance-sealed and topped with a two-part poured polymer resin built to an average of 1/8" thick. The polymer we use resists yellowing and consists of 100% solids for a rock hard playing surface that will last.
- California House climate adjusters (beneath the playfield) are designed for superior fine-tuning and strength. Climate adjusters keep the playfield slightly concave and under tension for proper play throughout the year. We use a 1/2" diameter all-thread with 20 threads per inch so your installer can fine tune the playability of the board.
- The climate adjusters are designed by Cal House and cut, welded, and powder coated in the USA. Climate adjusters are incredibly important to the playability of the board. PLEASE compare other manufacturers against ours. And if the shuffleboard you are looking at does not have them at all, do not expect your client to enjoy their game for very long.

- As most fine woodworkers know, balancing a piece of wood is extremely important. That means whatever material is on one side of the board should be on the other to balance the moisture exchange and keep warping to a minimum. This is no more important than on a shuffleboard playfield. California House uses the same two-part polymer resin on the bottom of the board as we do the top. The polymer costs \$100's of dollars per gallon, but we feel it is worth it in the long run to have an environmentally balanced playfield.
- Our logo and scoring areas are not stickers or paint that is applied to the wood and then sealed with polymer like everyone else. California House inlays our playfield with black walnut. The best shuffleboards get the finest details.

- Custom inlaid logos are available.
- Perhaps the one detail that separates California House shuffleboard tables the most in the marketplace are our padded end collars. The decorative yet functional collars protect your cradle

from the random flying weight (puck), gives you a perfect hand hold when shooting, and looks great. You get to choose from a multitude of colors of vinyls or leathers.

- Our cradles are built like furniture meant to stand the test of time with a solid hardwood chassis and corner blocked cross rails combined with a hardwood veneer plywood cradle bottom. Legs are pre-assembled at the factory and easily mounted with 5/16" bolts into metal inserts for strength. The solid construction is another reason California House shuffleboard tables are considered to be the finest you can buy.
- California House lines the alleys (area around the playfield) of our shuffleboard tables with polyester microfiber upholstery fabric, not indoor / outdoor carpeting. Microfiber alleys let you pick from a wide range of colors, looks great, and is easier to clean than carpeting.

- Finally, California House offers stylish, original designs that are on-trend yet feature timeless qualities. All Cal House shuffleboard tables are available in your choice of finish color, alley and collar upholstery, and are offered in a wide range of sizes.
