					PLAYPACK CUE LENGTH	

At California House, we often hear the question: "What is a regulation size pool table?" Simply put, a regulation size table means the play area is twice as long as it is wide, measured from the nose of the cushions. Rest assured, all California House tables meet this standard.

When selecting your pool table, the first step is ensuring it fits comfortably in your room. You'll need enough space around the table so that the cue doesn't bump into the walls when making a shot from the rail. Our handy measurements provide the minimum dimensions needed, including options for different cue sizes.

Next up, consider the table's purpose and who will be playing. If you're aspiring to go pro, a 9-foot table, the size used in professional tournaments, is your best bet. For those looking to enjoy casual games with friends and family, the 8-foot table is the most popular residential choice. And if you're planning to play with younger children, a 7-foot table is ideal, making the game more accessible and fun. In fact, most bar tables are 7-footers, perfect for faster games and more turns.

A pool table isn't just a game—it's a centerpiece for social gatherings. California House pool tables are crafted to be statement pieces in your game room, available in various styles, sizes, finishes, and cloth colors to perfectly match your decor.

Bring home a California House pool table and elevate your game room to a new level of style and entertainment!
